

Vision Statement and Project Plan

Library Management System — EECS447: Database Systems

Fall 2026 · Professor Hossein Saiedian

Team Name: DataBASED

1. Vision Statement

This database will be a reliable library management system that efficiently manages library books, magazines, digital media, client memberships, borrowing and returning transactions, reservations, and fees. The system will help library staff manage library operations and allow clients to search for items, reserve books, and check their loan status on their library membership. The database will also provide useful reports for both users for library fines, book availability, client activity, and more.

2. Scope Statement

This project database will include:

- Books, digital media, and magazine management.
 - Each with relevant attributes (title, author/creator, ISBN, genre, availability status, etc., with type-specific fields such as issue number for magazines).
- Client/membership management
 - Client attributes as ID, name, contact information, membership type, and account status.
 - Supporting multiple membership categories (e.g., regular, student, senior citizen), each with distinct borrowing limits and fee structures.
- Transaction tracking for all borrow and return events, including timestamps and the responsible client.
- A reservation system for items currently on loan.
- Notification system for upcoming due dates, overdue items, and available reserved items.
- Generate various reports, such as fine calculations, book availability, borrowing trends, and client activity
- Two user interfaces:
 - Library staff—Interface to check out items, process returns, add new items, and manage client accounts.
 - Clients—Interface to search the catalog, reserve items, check loan status, and etc.

3. Team Organization and Profiles

Name	Connor Eaton
Role	Developer
Contact	connoreaton1o9@ku.edu
Availability	MWF 12-2, 3-5 TR 2-5
Computing Platform Experience	Windows, Linux
Programming Language Knowledge	Python

Name	Kegan Firey
Role	Team Administrator, Developer
Contact	keganf01@ku.edu
Availability	MWF 9am-11am WF 1pm-5pm TR 4pm-5pm
Computing Platform Experience	Windows
Programming Language Knowledge	Python, C++

Name	Lydia Peng
Role	Developer
Contact	lydia64peng@ku.edu
Availability	MWF 9am-1pm, 3pm-5pm R 4pm-5pm
Computing Platform Experience	Windows, macOS
Programming Language Knowledge	Python, C#, C++, HTML, JavaScript, SQL

Name	Joseph Ubanda-Ruiz
Role	Developer
Contact	Email: jubanda@ku.edu
Availability	MWF 1pm-2pm, 3pm-4pm T 12:15pm-4:00pm R 12:15pm-2pm
Computing Platform Experience	Windows 11 and macOS
Programming Language Knowledge	Python, HTML, JavaScript, C

Role descriptions:

- Team Administrator: Primary contact/interface for the project
- Developer: Can take any role to develop the project. Roles may include and are not limited to git repo management, meeting log coordinator, and more.
- New roles will be assigned through out the project's duration.

4. GitHub Repository Management

- Repository URL: https://github.com/ubanda10245-code/EECS447_Library_System

- Access & permissions: All members have access and permissions to the git repo. Their only requirement is to document all changes and communicate with members about these changes.
- All project artifacts (vision statement, ER diagrams, meeting logs, and more) will be maintained in this repository.

5. Project Meeting Log

- Schedule: Every Friday at 3:30 pm
- Location: Via Microsoft Teams meeting

Each meeting entry below records the date, time, location, objective, members present, task completion confirmation, and tasks allocated. A sample first entry is given below; this template will be used in another document called "02 - Meeting Logs." This document will be updated weekly in the git repo with the most recent meeting log.

Date: The current date the meeting took place

Time: The time the meet began and ended (duration of the meeting)

Location: Virtual meeting

Objective: Current topic for the team to discuss during the meeting

Team members present: List of members present for the meeting

Tasks allocated: New assigned tasks to the entire team or certain members

Task completion: Assigned tasks that are **pending** or **completed** at the time of the meeting

Extra notes: Any notable details from today's meeting

6. Team Commitments to the Project

- Each team member must adhere to project deadlines.
- Contribute actively to the project and complete assigned tasks.
- Regular attendance at team meetings is mandatory.
